The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

I. Species 1 provides for a color separation method for determining ink quantity of

each ink, in order to reproduce any color using a plurality of color inks on a printing medium.

Step (c2) discloses adjusting the ink quantity of the spot color ink included in the color

separation ink quantity set in accordance with the lightness parameter so that ink quantity

decreases at a rate of change greater than the rate of change of the lightness parameter in the

direction of increasing lightness. According to this method, ink quantity of the spot color ink is

adjusted so as to be reduced at a rate of change greater than the rate of change of the lightness

parameter, whereby standing out of the spot color ink in lighter areas can be reduced, and

graininess in the image improved.

II. Species II provides for color separation method for determining ink quantity of

each ink, in order to reproduce any color using a plurality of color inks on a printing medium.

Step (c2) discloses (c2) providing first and second reproduction colors, the first and second

reproduction colors having a lightness parameter value within a first high lightness range

including a brightest portion of the lightness parameter value, the first and second reproduction

colors having a same primary color component ink, a same spot color component ink, and a same

lightness parameter value, the first reproduction color having hue relatively close to that of the

primary color component ink, the second reproduction color having hue relatively close to that of

Application/Control Number:

Art Unit: 2625

the spot color component ink; and determining ink quantity of the spot color ink included in the color separation ink quantity set so that a usage rate of the spot color ink for the second reproduction color is smaller than a usage rate of the spot color ink for the first reproduction color. According to this method, in bright image areas, the ink quantity of spot color ink is determined in such a way that the usage rate of spot color ink in areas of hue relatively close to the spot color ink is smaller than the usage rate of spot color ink in areas of hue relatively close to the chromatic primary color ink.

2. The species are independent or distinct because they are different/alternative methods for color separation and determining the ink quantity of each ink, in order to reproduce any color using a plurality of color inks on a printing medium.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there appears to be no generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

10/773,087 Art Unit: 2625

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marcus T. Riley whose telephone number is 571-270-1581. The examiner can normally be reached on Monday - Friday, 7:30-5:00, est.

10/773,087

Art Unit: 2625

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Twyler L. Haskins can be reached on 571-272-7406. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
